CONSULTING

# Continuous Standards Compliance

Is your organization prepared for the new era of Joint Commission unannounced surveys? BESLER Consulting provides customized services to assist clients in achieving compliance with accreditation standards. We partner with organizations of all sizes and, together with senior leadership, forge relationships that create a foundation for success. BESLER Consulting prides itself in tailoring practical and individual solutions to assist clients at any point in The Joint Commission survey readiness process.

BESLER consultants possess experience and expert knowledge in The Joint Commission continuous standards compliance process including PPR Development and Maintenance, Mock Survey, Staff Education and Training, Survey Assistance, Clarifying Evidence/Evidence of Standards Compliance, and Post Survey Support. BESLER Consulting can work with your organization before, during or after your survey on any of these topics with the goal of achieving and maintaining success in the accreditation process.

## PPR Development and Maintenance

BESLER Consultants can assist your organization in the preparation, development and maintenance of the annual Periodic Performance Review. Services include organizational assessment with standards compliance, development of corrective action plans and data collection required for Measure of Success (MOS).

## Mock Survey

Announced and/or unannounced mock surveys tailored to the organization's services. Surveys can be organizationally comprehensive or customized to your individual needs. Survey specific assessments can be conducted relating to National Patient Safety Goals, medical staff credentialing and compliance and/or competence assessment. A gap analysis will be provided identifying areas of non-compliance with concrete recommendations for improvement.

## Staff Education and Training

Education on Standards, National Patient Safety Goals, tracer methodology including chart navigation and surveyor interaction.

## Survey Assistance

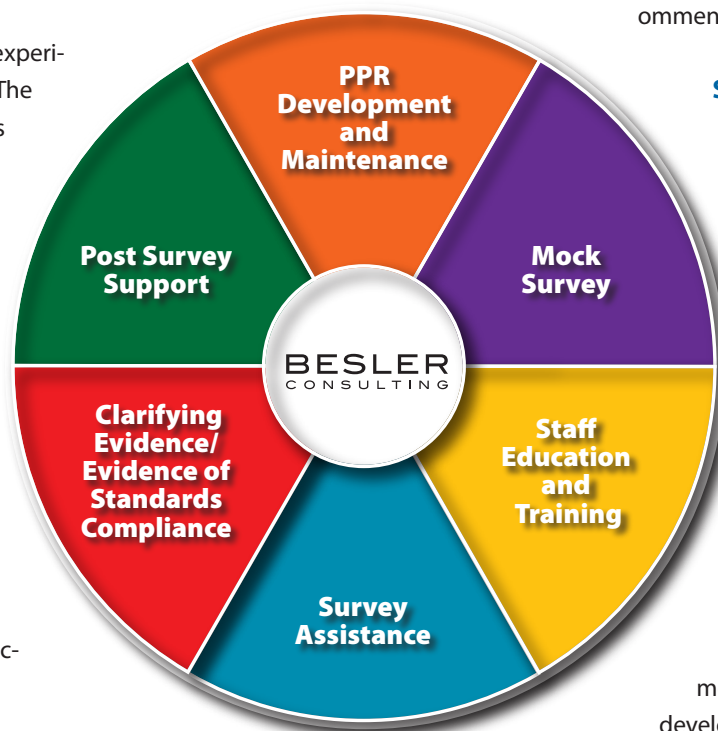

Consultative on or off site services during the Joint Commission survey.

## Clarifying Evidence/ Evidence of Standards Compliance

Survey report analysis and development of opportunities for clarification; develop corrective action plans for evidence of standards compliance and assist with data collection.

## Post Survey Support

On-going tracers, staff education regarding changes to standards and National Patient Safety Goals and on-going compliance monitoring.
